As we enter the age of Artificial Intelligence, there is a lot of uncertainty in the art. Some approach it with optimism, while others are skeptical, pessimistic or cynical. The AI Age is simply the 4th Industrial Revolution and as with the other three revolutions in the past, we will discuss how humans will adapt and leverage new technology and how the Future of Work will be impacted. While there will be some dislocation in the short run, we foresee yet another major stepping stone in the advancement of mankind. We will examine, in detail, some of the technologies involved in shaping our future along with some illustrative use cases
